Experience Nature in Canada

Discover the wonders of the natural and cultural Canadian landscape, while exploring the rich biodiversity of the Cheakamus River Valley

Place

Cheakamus Centre is located on 165 hectares of ecological reserve within an hour's drive north of Vancouver, and less than 30 minutes south of Whistler resort. In nature's outdoor classroom, Cheakamus program staff engage students in hands-on exploration of ancient forests, salmon spawning habitat and cycles, ponds ecology, and interpretive trails. In the heart of the campus is the state-of-the-art Environmental Learning Centre that serves as a model for sustainable building design. Other campus facilities include a teaching salmon hatchery, farm, and forest and aquatic labs. Trail-side shelters, campfire sites and an amphitheater provide additional covered outdoor learning areas for gathering and rainy-day activities.

Hospitality

Cheakamus Centre offers a warm and welcoming ambience that puts students at ease. Sleeping accommodations are in clean, West Coast style rustic cabins with two shared bathrooms and bunk style beds. 9 cabins can comfortably sleep up to 105 students and their group leaders. Two cabins are wheelchair accessible, with separate bedrooms for students requiring extra support. Cabins are grouped close together to foster a sense of community, and for ease of supervision. Shared mealtimes are an integral part of building community and connection. Chef Wade's talented food service team prepare delicious, nutritious meals and snacks, using seasonal produce from onsite gardens and local producers. Most special dietary requests can be accommodated, Join us for an authentic Canadian education experience your students won't soon forget!

- Birds & Wildlife Study
- Farm Study
- Forest Study: Ecology & Sensory Exploration Mini Raft Build Challenge
- Forest Study: Indigenous Perspectives
- Pond Study
